

Computer Buddy Basic Computers

Computer Buddy Basic Computers are designed to give you a quality computer at a reasonable price. Made from top quality brand name parts that have been reviewed for stability and long life, our computers use the latest technology so you get the most power for your money. Our computers retail for less than comparable Dell computers

Our computers are delivered with fully optimized Windows XP Home or Pro. Ask us about anti-virus options that protect you but don't slow down your computer.

Computer Buddy Basic Workstation

- Intel Core 2 Duo 3.00 GHz processor
- 1333 Bus Speed for faster performance
- 2 GB Ram
- 80 GB Hard Drive
 - 7200 RPM 3.0GB/s 16Mb Cache SATA drive. Move data faster.
- Intel GMA 3100 graphics
- 20x CD/DVD writer
- Keyboard and mouse
- Quality steel case
- Windows XP Home

Total: \$750.00 without Monitor

Add 19" LCD Monitor w/ built in speakers +\$200.00
Add Avast! Anti-virus +\$39.95

Computer Buddy File Server

- Intel Core 2 Duo 3.0 GHz processor
- 1333 Bus Speed for faster performance
- 2 GB Ram
- 160 GB Hard Drive RAID 1
 - 7200 RPM 3.0GB/s SATA drive. Move data faster.
 - Western Digital RE high reliability drives
- 20x CD/DVD writer
- 512 MB Video card
- Keyboard and mouse
- Firewire capable
- High quality case
 - Superior cooling
 - Quiet operation
 - Room for expansion
- Quality dual rail power supply
- Windows XP Pro

Total: \$1375.00 without Monitor

Add 19" LCD Monitor w/ built in speakers +\$200.00
Add Avast! Anti-virus +\$39.95

Computer Buddy Green Computers

Computer Buddy Green Computers are designed with our environment in mind. We select the components of these computers based on 4 criteria:

- **Green production.** Does the manufacturer focus on reducing the carbon footprint and pollution associated with manufacturing the component?
- **Low Energy Consumption.** Does the component help the overall build achieve energy efficiency?
- **Longevity.** Is the manufacturer committed to using top quality materials so the component lasts as long as possible, reducing the need for replacement and disposal.
- **Green Awareness.** Vote with your dollars. We purchase from manufacturers who are committed to and actively endorse green manufacturing and environmental responsibility.

The result of following these criteria is a line of computers that are energy efficient without sacrificing power. We design each of these computers to be powerful enough to allow you years of productive use. All parts are easily replaceable and upgradeable to reduce waste by allowing repair and reuse of components in the future.

All of our computers are delivered with fully optimized Windows XP Home or Pro. Ask us about anti-virus options that protect you but don't slow down your computer.

Computer Buddy Basic Green

- Intel Core 2 Duo 3.00 GHz processor
 - Only uses 65 Watts of power
 - 1333 Bus Speed for faster performance
- Asus Energy Efficient Motherboard
 - ASUS EPU-4 Engine intelligently controls how much power your computer uses
 - AI Nap allows your computer to use less power in sleep mode, and reduces power consumption while performing tasks with no user input
 - Uses high quality electronic components to dramatically increase lifespan
 - Asus is an EPEAT member, has a strong sustainability program, and is a leader in creating new energy efficient technologies for computers
- 2 GB Ram
 - Gskill 1.8v DDR2 memory uses less power, but delivers performance
- Western Digital Green 640 GB hard drive
 - 3.0GB/s 16Mb Cache SATA drive. Move data faster.
 - 40% more power efficient than standard drives
- Intel GMA X4500HD Graphics
 - Fast High Definition graphics
 - Onboard graphics controllers use less power
- High Quality Antec computer case
 - Uses an Earthwatts 80% plus efficient power supply to reduce power consumption
- LG 22x CD/DVD writer
 - LGA is EPEAT certified and has a strong sustainability program
- Logitech Keyboard and mouse
- Windows XP Home

Total: \$1100.00 without Monitor

Add 19 " Epeat Certified LCD Monitor w/ built in speakers

+\$275.00

Add Avast! Anti-virus

+\$39.95

Computer Buddy Green Beastie

Very powerful with plenty of room for expansion later. Consider this model as a file or database server. Ask us about upgrades to create your ultimate green gaming computer.

- Intel Core 2 Quad 2.83 GHz processor
 - Only uses 95 Watts of power
 - 1333 Bus Speed for faster performance
 - 12MB Cache for faster performance
- Asus Energy Efficient Motherboard
 - ASUS EPU-6 Engine dramatically reduces how much power your computer uses
 - 16 Phase power conditioning reduces how much power your computer uses, and improves computing performance.
 - Uses high quality electronic components to dramatically increase lifespan
 - Asus is an EPEAT member, has a strong sustainability program, and is a leader in creating new energy efficient technologies for computers
- 2 GB Ram
 - Gskill 1.8v DDR2 memory uses less power, but delivers performance
- RAID 1 – Mirrors data for data security
 - 2 Hard drives working as one, so if one fails your data is safe
 - 2 Western Digital Green 640 GB hard drives
 - 3.0GB/s 16Mb Cache SATA drive. Move data faster.
 - 40% more power efficient than standard drives
- Asus GeForce graphics card
 - Fast 3D Graphics
 - Works with Asus motherboard to reduce power used to generate 3D Graphics
- High Quality Antec computer case
 - Uses an Earthwatts 80% plus efficient power supply to reduce power consumption
- LG 22x CD/DVD writer
 - LGA is EPEAT certified and has a strong sustainability program
- Logitech Keyboard and mouse
- Windows XP Pro

Total: \$1600.00 without Monitor

Add 19" Epeat Certified LCD Monitor w/ built in speakers

+\$275.00

Add Avast! Anti-virus

+\$39.95
