

## Computer Buddy Basic Workstation

Computer Buddy Basic Workstations are designed to give you a quality computer at a reasonable price. Made from top quality brand name parts that have been reviewed for stability and long life, our computers use the latest technology so you get the most power for your money. Our computers retail for less than comparable Dell computers

Our computers are delivered with fully optimized Windows 7 or Windows XP Professional based on your needs. Ask us about anti-virus options that protect you but don't slow down your computer.

| • <i>Ask us about other monitor options</i>  |           |

## Computer Buddy File Server

Computer Buddy File Servers are designed to bring the reliability of redundant dedicated storage to small offices. Our file servers centralize your files for shared employee access, centralize backup for more reliability and ease of monitoring, and provide an “extra” computer in the office for use in emergencies.

The primary feature of our file servers is mirrored data storage. Your data is stored on 2 hard drives acting as one drive. This feature protects you from data loss if a hard drive fails. It also allows your file server to keep functioning even if one hard drive crashes so you experience no downtime. In the event of drive failure, the second drive takes over and we replace the failed drive which is then automatically synchronized with the working drive.

Our computers are delivered with fully optimized Windows 7 or Windows XP Professional based on your needs.

### Computer Buddy File Server

- Intel E8400 Core 2 Dual 3.0 GHz processor
- 1333 Bus Speed for faster performance
- 2 GB Ram
